Professional Summary

Java Full-Stack Developer skilled in Spring Boot, React.js, and MySQL with hands-on experience building full-stack applications and RESTful APIs. Adept at solving real-world problems through scalable solutions and collaborative Agile practices.

Skills

Programming: Java (Core OOPs), SQL, PL/SQL
Web: HTML, CSS, JavaScript, React.js
Backend: JDBC, Servlets, Hibernate, Spring Boot
Tools: Git, Postman, VS Code, Eclipse
Soft Skills: Communication, Teamwork, Problem solving, Adaptability.

Experience

Java Full Stack Development Intern

Feb 2025 – May 2025

JSpiders

- Developed Java-based web applications using Java, JDBC, Servlets, and SQL.
- Built full-stack interfaces using HTML, CSS, and JavaScript, and integrated backend logic with Java EE technologies.
- Participated in 10+ mock interviews, daily coding challenges, and group discussions, boosting problem-solving accuracy by 40

Java Full Stack Intern

Oct 2024 – Dec 2024

Infosys SpringBoard

- Completed structured training on Java Full-Stack Development covering Spring Boot, React, MySQL, and RESTful APIs, building and deploying real-time mini-projects.
- Achieved certifications in Java, DBMS, OOPS, Agile, and DSA, applying theoretical knowledge to hands-on assignments.
- Collaborated with peers in a simulated Agile environment, contributing to team-based tasks and sprints.

Education

Government Engineering College ChamaraJanagara

Feb 2023 – May 2025

BE in Computer Science and Engineering

Projects

Personal Finance Management System

[Github Link](#) 

- **Tech Stack:** Java, Spring Boot, React.js, MySQL.
- Improved a full-stack web application to track income, expenses, and financial goals
- Implemented secure user authentication using JSON Web Tokens (JWT) to ensure data protection and role-based access control in a full-stack web application
- Planned RESTful APIs for transaction handling and data retrieval
- Integrated MySQL database for storing user and transaction data

To-Do List

[Github Link](#) 

- **Tech Stack:** HTML, CSS, JavaScript.

- Created and expanded a responsive To-Do List web application with dynamic task management
- Executed core features like adding, editing, marking as complete, and deleting tasks using JavaScript DOM manipulation
- Applied CSS styling for a clean, user-friendly interface and enhanced user interaction without any backend
- Ensured smooth client-side performance and usability across devices

Text to Speech Converter

[Github Link](#) 

- **Tech Stack:** HTML, CSS, JavaScript.
- Developed and enhanced a web-based Text-to-Speech application using the Web Speech API, enabling conversion of user-input text into audible speech with interactive voice control features
- Applied features like text input, voice selection, and speech playback controls for better user interaction
- Styled the UI using CSS for a clean, responsive interface compatible across devices.
- Ensured seamless browser-based performance without requiring backend integration

Online Book Store

[Github Link](#) 

- Tech Stack: Java, JDBC, Servlets, MySQL, HTML, CSS.
- Developed and enforced a dynamic web application for browsing, searching, and purchasing books online
- Improved user registration and login functionality by implementing Java Servlets and HTTP session management to enhance authentication and maintain user state across the application
- Used JDBC to perform CRUD operations on book inventory and user data stored in MySQL database
- Created responsive front-end pages using HTML and CSS for a user-friendly shopping experience
- Ensured seamless interaction between front-end and back-end with clear navigation and data flow
